

SSH 上去/system/etc/firmware 泄露 nvram 信息

```
/system/etc # cd firmware/
/system/etc/firmware # ls
config.txt          fw_bcm40181a2_cpsta.bin  nvram.txt
/system/etc/firmware # cat
/system/etc/firmware # cat nvram.txt
#AP6251U_NVRAM_V1.0_20130731
manfid=0x2d0
prodid=0x492
vendid=0x14e4
devid=0x4343
boardtype=0x0598

# Board Revision is P307, some nvram file can be used for P304, P305, P306 and P307 as
#Please force the automatic RX PER data to the respective board directory if not using
ng directory /projects/BCM43362/a1_labdata/boardtests/results/sdg_rev0305
boardrev=0x1307
boardnum=777
xtalfreq=26000
boardflags=0xc00
sromrev=3
wl0id=0x431b
macaddr=00:90:4c:07:71:12
ao2g=1

命令输入
```
